

MONTANA NAVIGABLE RIVERS AND LAKES THAT REQUIRE MT-DNRC PERMITTING PURSUANT TO SB 507

Red lines and/or polygons indicate rivers and lakes in Montana with historic evidence of commercial use that have been judicially determined as navigable. Light blue lines indicate rivers and lakes with historic evidence of commercial use that are meandered on General Land Office survey plats and considered as navigable under SB 507. Montana Dept. of Natural Resources and Conservation will actively manage these waterways per SB 507 (effective October 1, 2009). The State of Montana owns navigable waterways pursuant to the Equal Footing Doctrine, state statutes, and abundant case law. For more information, contact Trust Land Management Division, MT DNRC at (406) 444-2074. July 22, 2009 edition.
